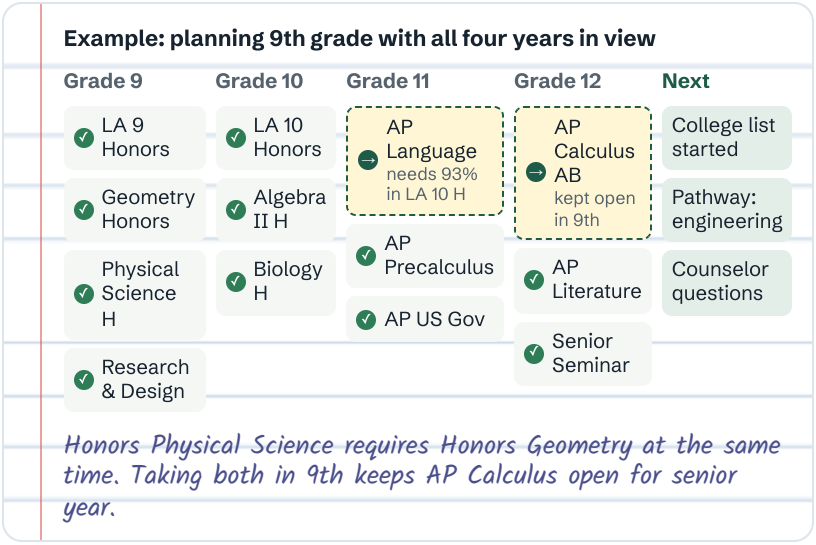
# From ninth grade to what's next.

Starting high school? Build the four-year plan now, keep every door open, and see the path to college from the first day of 9th grade.



## What a plan check catches.

A careful parent planned every course: 24 credits against 21 required. Checked against the school's published rules, the plan didn't graduate.

- **Math, 1 credit short.** 8th-grade courses counted as electives.
- **English, 1 credit short.** AP Literature is a 12th-grade course.
- **A 9th-grade requirement** was never scheduled.
- **A senior-year requirement** was planned for 11th.

### Four-year plan

Every course from 8th grade on, including online, dual-enrollment and study-abroad courses, planned together as a family.

### Graduation check

Credits by subject, GPA, and exactly what's left, using your school's own rules. Wrong-grade courses get flagged.

### Colleges

Build a list, track every application from "considering" to "enrolled", and see every deadline in one place.

### Ready for the counselor

A running list of questions tied to each course, and a one-page sheet to bring to the meeting.

**4**

problems the plan check found in one careful family's plan, caught in 9th grade instead of senior year.

**Parents get their own account.**
Link one or more students and edit the plan together.

**We never sell student data.**
No ads and no lead lists for colleges. Export or delete everything.

**Your school's data, only if you say so.**
Coming for participating schools: connect a school graduation tracker to see verified credits; disconnect any time.

## Start your 9th-grade plan. Keep every door open.
